Cloud WorkSpaces made simple

### Smart desktop disaster-recovery strategy - with Kivito deskMate

As one of the leading manufacturers of high-quality interior equipment systems for the automotive industry, our customer operates his headquarters in Saxony, as well as a development center in Wolfsburg and two plants in the Czech Republic. Due to its innovative strength and efficiency, the company has already received numerous national and international awards.

#### Disaster Recovery Plan (DR):

The terms just-in-time and just-in-sequence are part of everyday life in the automotive industry. However, manufacturers' demands on suppliers are also increasing in the areas of high availability and disaster recovery plans (DR). A DR strategy for desktops has been extremely expensive and expensive, as sites and devices had to be duplicated. In addition, care must be taken to ensure that the DR site is always up to date with the production infrastructure.

The dilemma requirements on the one hand and costly disaster recovery environments on the other hand can be countered with a DR scenario based on desktops as a service (DaaS).

## CHALLENGES

- Implement a low-cost DR strategy for the company's physical desktops.
- In the disaster case, employees must be able to use private devices regardless of location and device.
- Strict safety requirements of the car manufacturer must be kept.
- DR strategy must be flexibly expandable even when growing.
- No costly and time-consuming annual DR testing is required.

## SOLUTION

- deskMate is used as a DR strategy for the physical desktops. Images of the different user classes are deployed in the DeskMate environment.
- Connecting the deskMate environment to Windows Active Directory as well as the enterprise network environment.
- Access via HTML5 browsers from any desktop or mobile.
- Ensuring data security and data protection through ISO 27001 certified hosting in a German data center.
- Monthly billed service with monthly notice periods.

## ADVANTAGES

- Very smart desktop DR strategy. If necessary, the desktops can be activated immediately and are available to the users.
- Employees only need Internet access for productive work. No VPN necessary.
- Employees are location- and device-independent, even private devices can be used.
- Very affordable, secure and easy-to-administer Desktop DR strategy.
- Time-consuming DR test eliminated.
- Thanks to the deskMate solution, freelancers or project employees can also be flexibly and securely integrated into the company.

### About deskMate:

deskMate is a trademark of Kivito GmbH.

deskMate is based on the trueDaaS technology, a cloud generation software developed in Germany of the newest generation. The technology enables the use of any software - independent of the underlying operating system - on a virtual desktop. With deskMate, the company also offers desktop-as-a-service (DaaS) "made in Germany" for small and medium-sized companies. The processing of the data takes place exclusively in German data centers with the highest security standards.

In 2014, the trueDaaS technology was recognized by the Experton Group as a rising star in the cloud desktop sector. In September 2016, deskMate was confirmed by Forrester Research as one of the world's leading cloud workspace technologies.
