

"Using deskMate not only makes our employees' DATEV access more flexible, it also makes it much easier to connect our clients to your DATEV environment."

deskMate  
POWERED BY KIVITO

Cloud WorkSpaces made simple

### Flexible even in Datev environments - with Kivito deskMate

Our German customer is a law firm that specializes in small and medium-sized companies. For more than 20 years now, the contact persons have been helping their clients make the right decisions for a successful company with the right decisions. The extensive service portfolio ranges from financial accounting to the preparation of annual financial statements to corporate consulting regarding the strategic direction of companies.

### Flexible access to sensitive data:

The working culture of today's society is in transition. More and more employees have the desire to work from anywhere. Be it to avoid the daily traffic jam, or to reconcile work and family. This type of implementation has often failed SMEs' IT requirements. Although private devices are available, they have been causing sleepless nights to IT managers and any general manager due to security risks. Previous solutions are sometimes very complex in application and administration and can not be flexibly scaled.

## CHALLENGES

- Optimum use of existing access licenses.
- Safe, affordable and easy to set up home workstations.
- Particularly sensitive customer data should be collected on systems separate from other customers.
- Clients should have access to their Datev environment.
- Easy management of access by own employees and the man-dants.
- Automated backup of clients and employee desktops with centralized backup option.

## SOLUTION

- "Installation" of all employee and customer access desktops centrally in the deskMate data center.
- Applications and data are located in the secure ISO 27001 certified deskMate data center in Germany.
- Easy restore of desktop images within minutes.
- Monthly billed service from a German, highly secure data center with monthly notice periods.
- Accessibility via HTML5 browser from any location or even from home.
- Central management of all deskMate desktops

## ADVANTAGES

- Network-technically isolated environments very easy.
- Extension of the "lifespan" of the physical desktops to 5 years.
- Easily grant customer access without sacrificing security
- Flexible subscription and withdrawal of desk tops with variable monthly billing. Also ideal for campaigns and seasonal peak orders.
- USB forwarding and "Copy & Paste" function can be activated and deactivated centrally.
- Pooling requires fewer licenses.
- Secure access through two-factor authentication

### About deskMate:

deskMate is a trademark of Kivito GmbH.

deskMate is based on the trueDaaS technology, a cloud generation software developed in Germany of the newest generation. The technology enables the use of any software - independent of the underlying operating system - on a virtual desktop. With deskMate, the company also offers desktop-as-a-service (DaaS) "made in Germany" for small and medium-sized companies. The processing of the data takes place exclusively in German data centers with the highest security standards.

In 2014, the trueDaaS technology was recognized by the Experton Group as a rising star in the cloud desktop sector. In September 2016, deskMate was confirmed by Forrester Research as one of the world's leading cloud workspace technologies.
