

"Finally a solution for my clients who communicate with us through DATEV Online Applications, but not use Microsoft Internet Explorer".

deskMate
POWERED BY KIVITO

Cloud WorkSpaces made simple

DATEV Online apps also in Apple environments - with Kivito deskMate

Our client is a tax consulting company in the north of Stuttgart with 12 permanent employees. For many years, companies and private individuals have counted on the expertise of the family business. Our client is increasingly looking after clients in the creative and media industry as well as freelancers.

Access to the other world:

When using Windows applications in Apple macOS environments, users, consultants and IT departments often face major challenges. Unlike in industrial environments, the creative and media industries often find pure Apple environments in which very few Microsoft products can run. Software vendors often avoid porting because the number of potential customers is too low.

Existing solutions Integrating Windows applications into Apple environments is often cumbersome to use, very expensive to implement, or simply unacceptable to the user.

CHALLENGES

- DATEV Enterprise Online and DATEV Free Online Application required MS Internet Explorer, but the customer had a pure Apple macOS environment.
- Several employees of the customer should have access to DATEV applications regardless of their location.
- Electronic document and document exchange between Mac OS client environment and DATEV applications.
- Automatic backup of "Internet Explorer environment".

SOLUTION

- Installing deskMate virtual desktops and MS Internet Explorer as dictated by DATEV.
- Centralized access and rights management for all employees who have access to deskMate desktops.
- Document and data exchange between DeskMate and customer environment via cloud filehosting services such as Dropbox and Nextcloud
- Monthly billed service from a German, highly secure data center with monthly notice periods.
- Access via HTML5 browsers from any location or even from home.

ADVANTAGES

- In spite of the Mac OS environment, customer employees can use DATEV applications.
- Exchange of documents, scans, documents possible.
- Easily grant employee access without compromising security.
- Safe working not only in the office but also at home and on the road.
- Environment and Windows settings are backed up automatically.
- Secure access through two-factor authentication.

About deskMate:

deskMate is a trademark of Kivito GmbH.

deskMate is based on the trueDaaS technology, a cloud generation software developed in Germany of the newest generation. The technology enables the use of any software - independent of the underlying operating system - on a virtual desktop. With deskMate, the company also offers desktop-as-a-service (DaaS) "made in Germany" for small and medium-sized companies. The processing of the data takes place exclusively in German data centers with the highest security standards.

In 2014, the trueDaaS technology was recognized by the Experton Group as a rising star in the cloud desktop sector. In September 2016, deskMate was confirmed by Forrester Research as one of the world's leading cloud workspace technologies.
